

GORIZIANE

Innovating Together

SINCE 1948, A FAMILY COMPANY

PROFILE

GORIZIANE
**CREATES, TRANSFORMS
AND INNOVATES
MOVING SYSTEMS**
RELYING ON ADVANCED
ENGINEERING AND
STRONG ATTITUDE TO
PROBLEM SOLVING.

Goriziane expertise in technology can be applied to a broad spectrum of market sectors. Goriziane aims at bringing innovation to the market listening to customers' needs. Innovation is at the core of what we do.

DIVISIONS

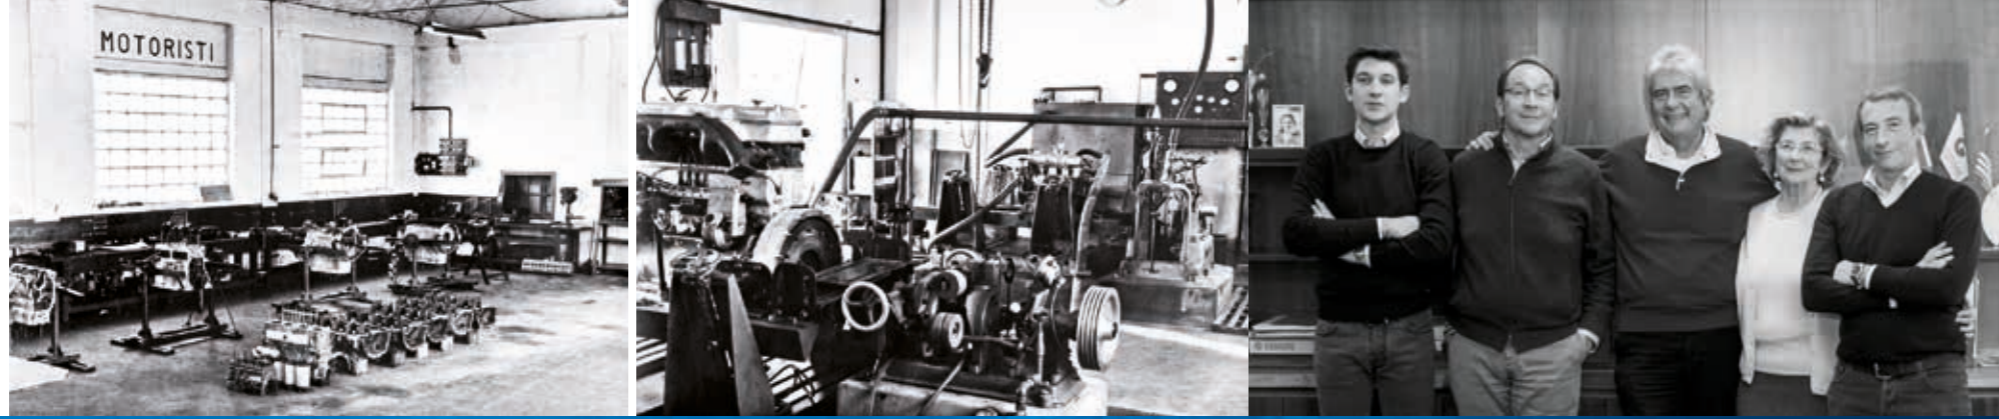

**MAINTENANCE,
REPAIR,
OVERHAUL**

**ENGINEERING &
CONSTRUCTION**

THE COMPANY DIVISIONS **DESIGN, BUILD, OVERHAUL** AND **UPGRADE** MACHINERY, PLANTS, AND VEHICLES ALSO GRANTING ON-SITE ASSISTANCE AND RELIABLE **AFTER-SALE** SUPPORT.

Gorziane core business covers a wide range of sectors, i.e. Defence, Oil and Gas, Naval, Railway and Industry.
The **E&C Division** relies on multi-disciplined engineers who are committed to delivering landmark projects.
The **MRO Division** relies on a highly-skilled team of technicians who are able to provide customers with quick and efficient solutions.

HISTORY

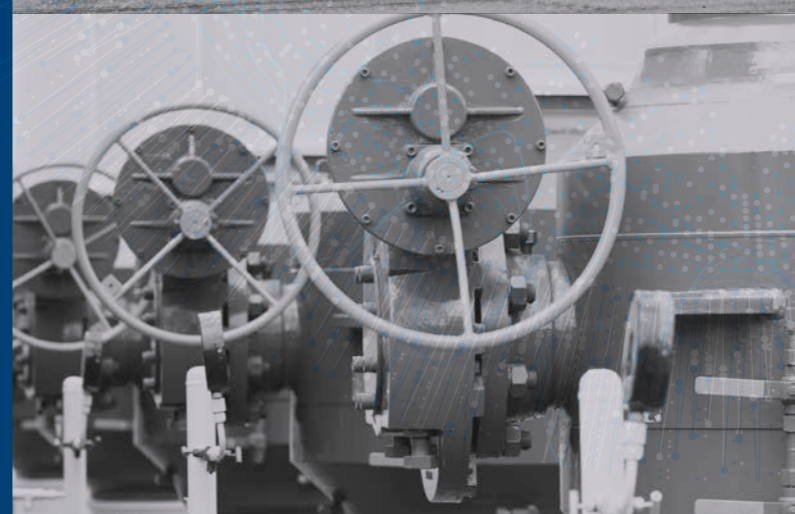

FAMILY COMPANY SINCE 1948, GORIZIANE IS WORLD LEADER IN THE **MRO** OF MILITARY VEHICLES, AND NOWADAYS IT ALSO HAS A DEEP **ENGINEERING AND CONSTRUCTION** EXPERTISE IN THE OIL&GAS AND NAVAL SECTOR.

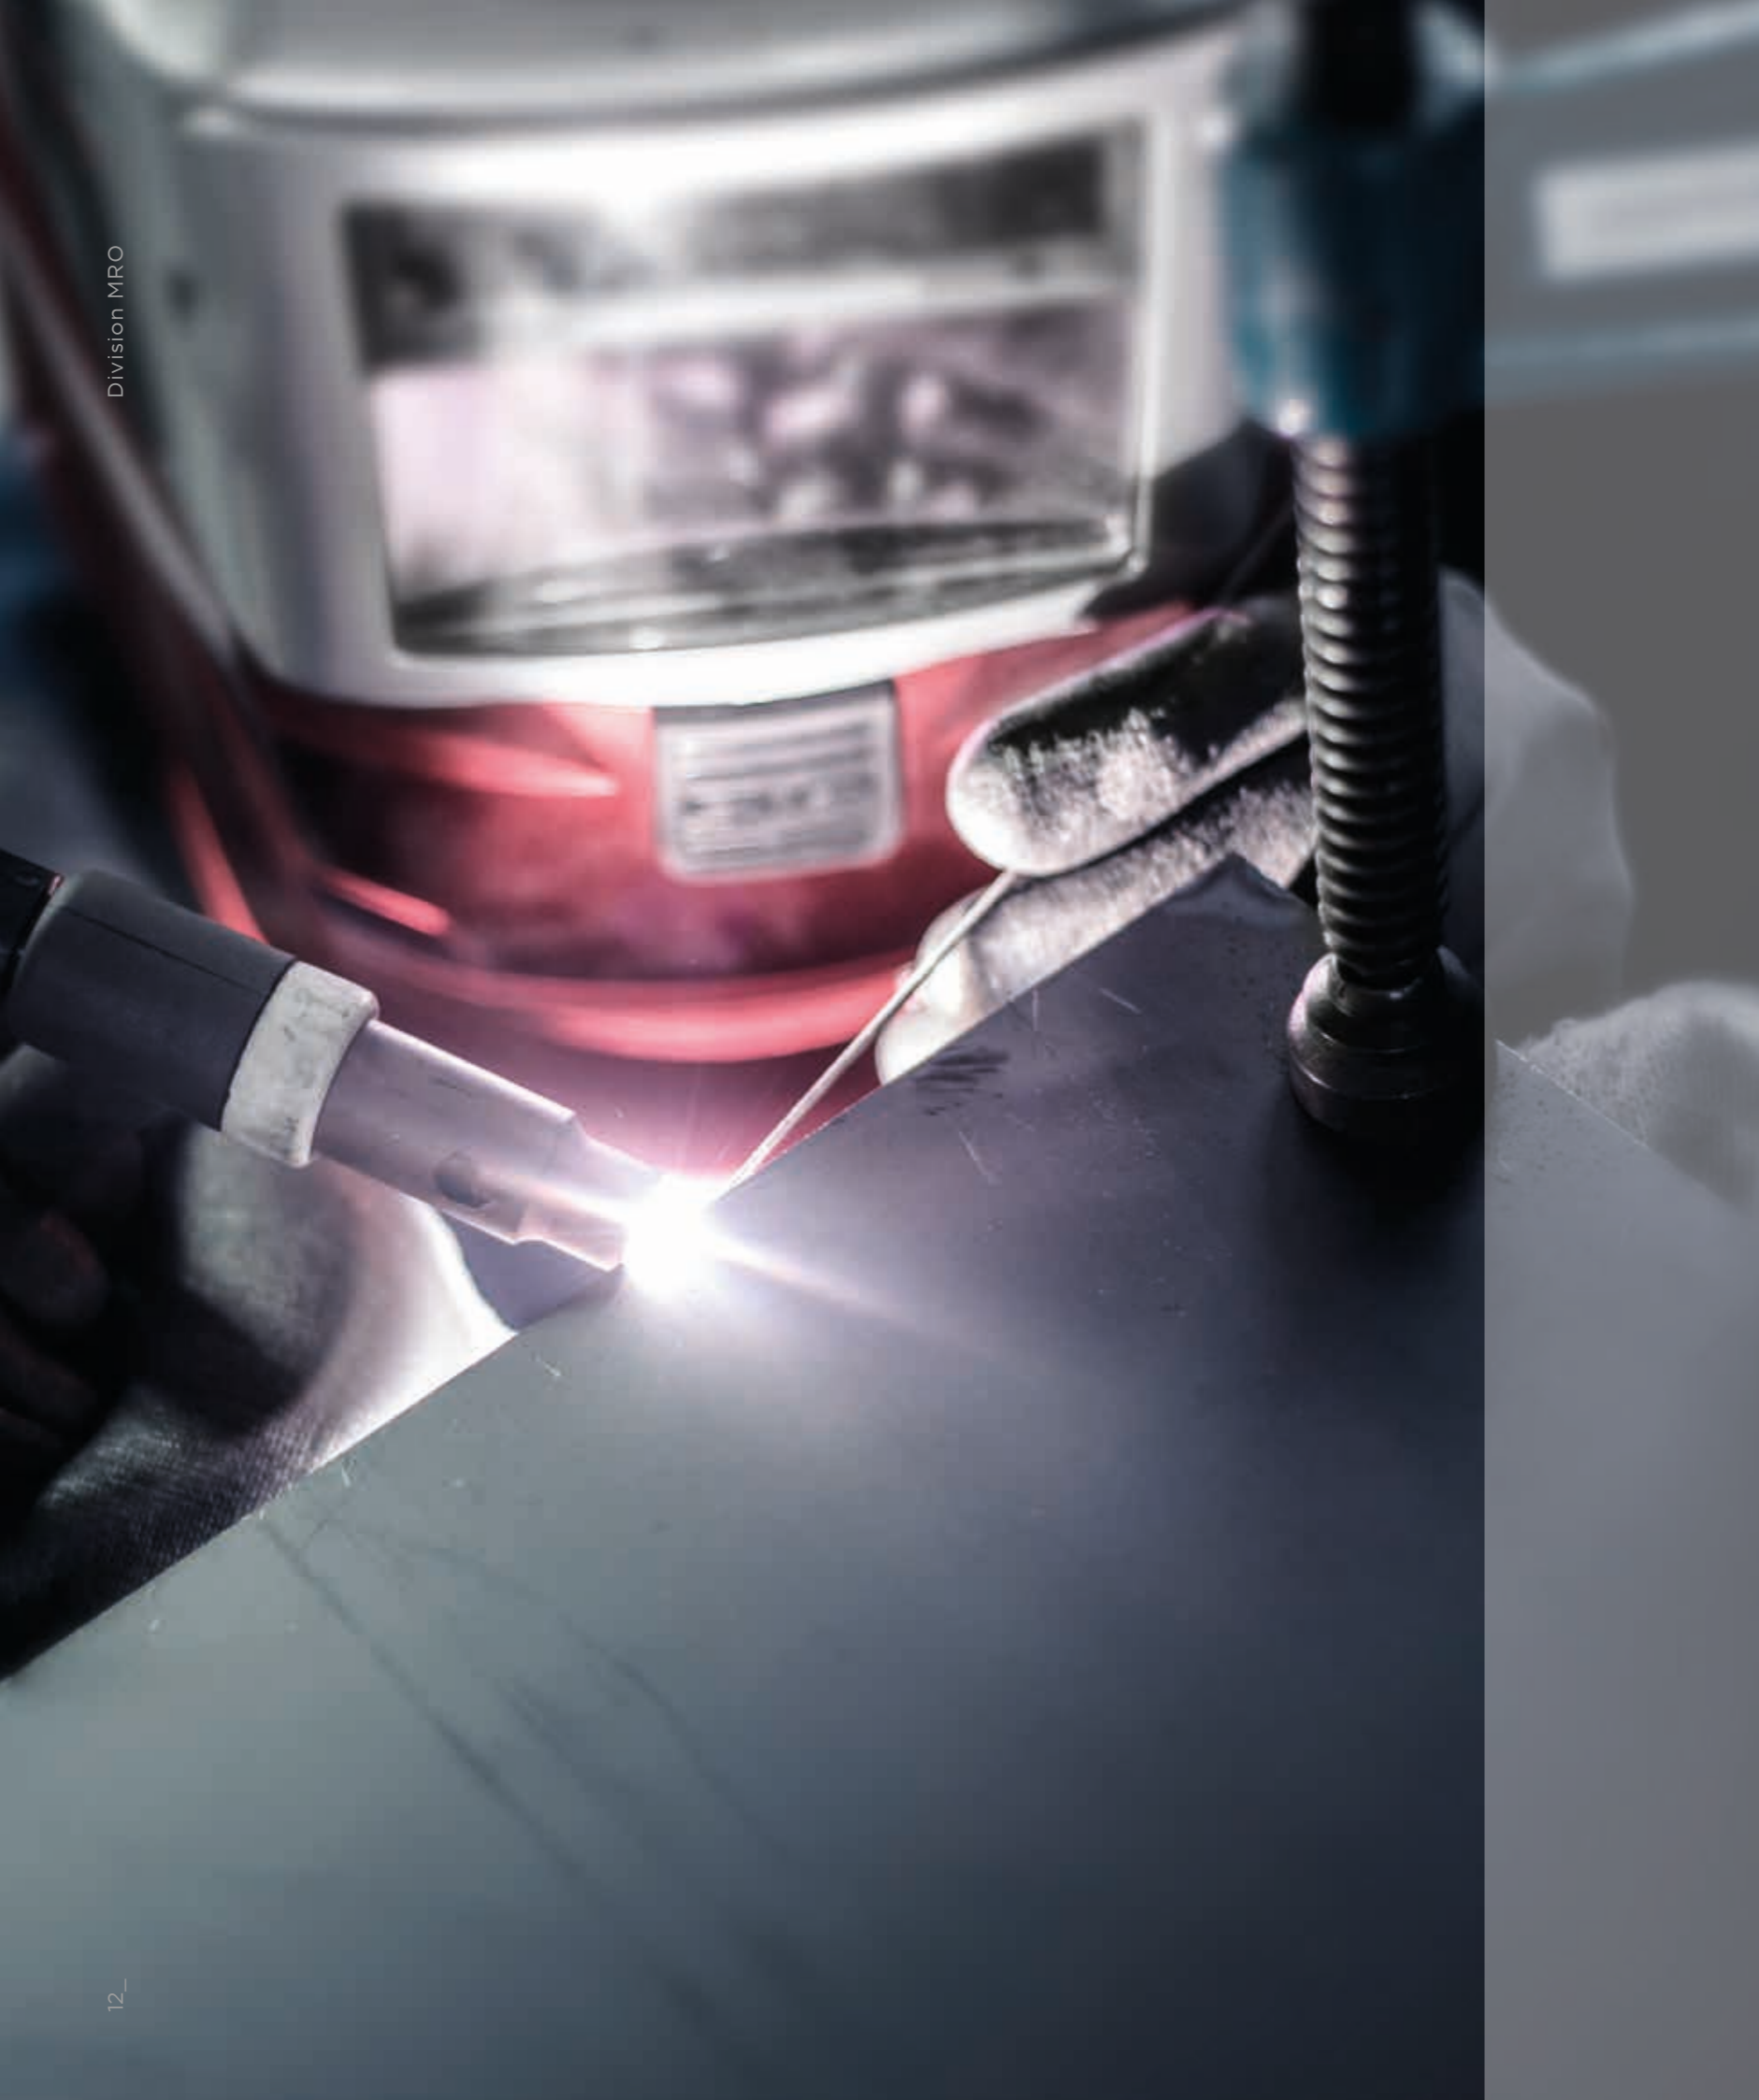

Goriziane is still run today by the Zanin Family who has carried on with enthusiasm and passion the work begun by the founder, Antonio Zanin. Goriziane has been partner of the Italian Army for several years providing it with flawless maintenance services.

Thanks to the know-how deriving from the Defence Sector, Goriziane started maintaining, overhauling and upgrading also machines for the Oil&Gas and Earthmoving Sectors in the 80s. Afterwards, Goriziane started designing and manufacturing pipeline equipment becoming one the most important supplier worldwide.

DIVISION

MAINTENANCE, REPAIR, OVERHAUL

The MRO Division is supported by a deep technical know-how, and it has a focus on continuous improvement and innovation. Nowadays it operates in several sectors.

INTEGRATED SERVICE

Goriziane has highly skilled and experienced technicians who provide superior quality and cost-effective MRO activities. It also provides engineering support. MRO programmes can be customised to meet customers' schedules and budgets. Engineering has a key role in maintenance and repair processes. The experienced technicians and engineers know every part and component of vehicles, machines, equipment and plants and thus are able to investigate and find out any breakdown and correct faults in a mechanical, hydraulic or electronic system.

IN-HOUSE SERVICE

All the MRO activities are carried out in-house, thus 100% made in Goriziane. The property is fully equipped with equipment such as overhead lifts and test benches which let us smoothly carry out all the required activities within the MRO field. Thanks to the property area dimensions, there are wide warehouses, where big quantities of spares can be stored and available to be used anytime.

It is also worth mentioning the strategic location of Goriziane near main Italian ports and railway stations; vehicles can easily reach Goriziane and be delivered worldwide after repair.

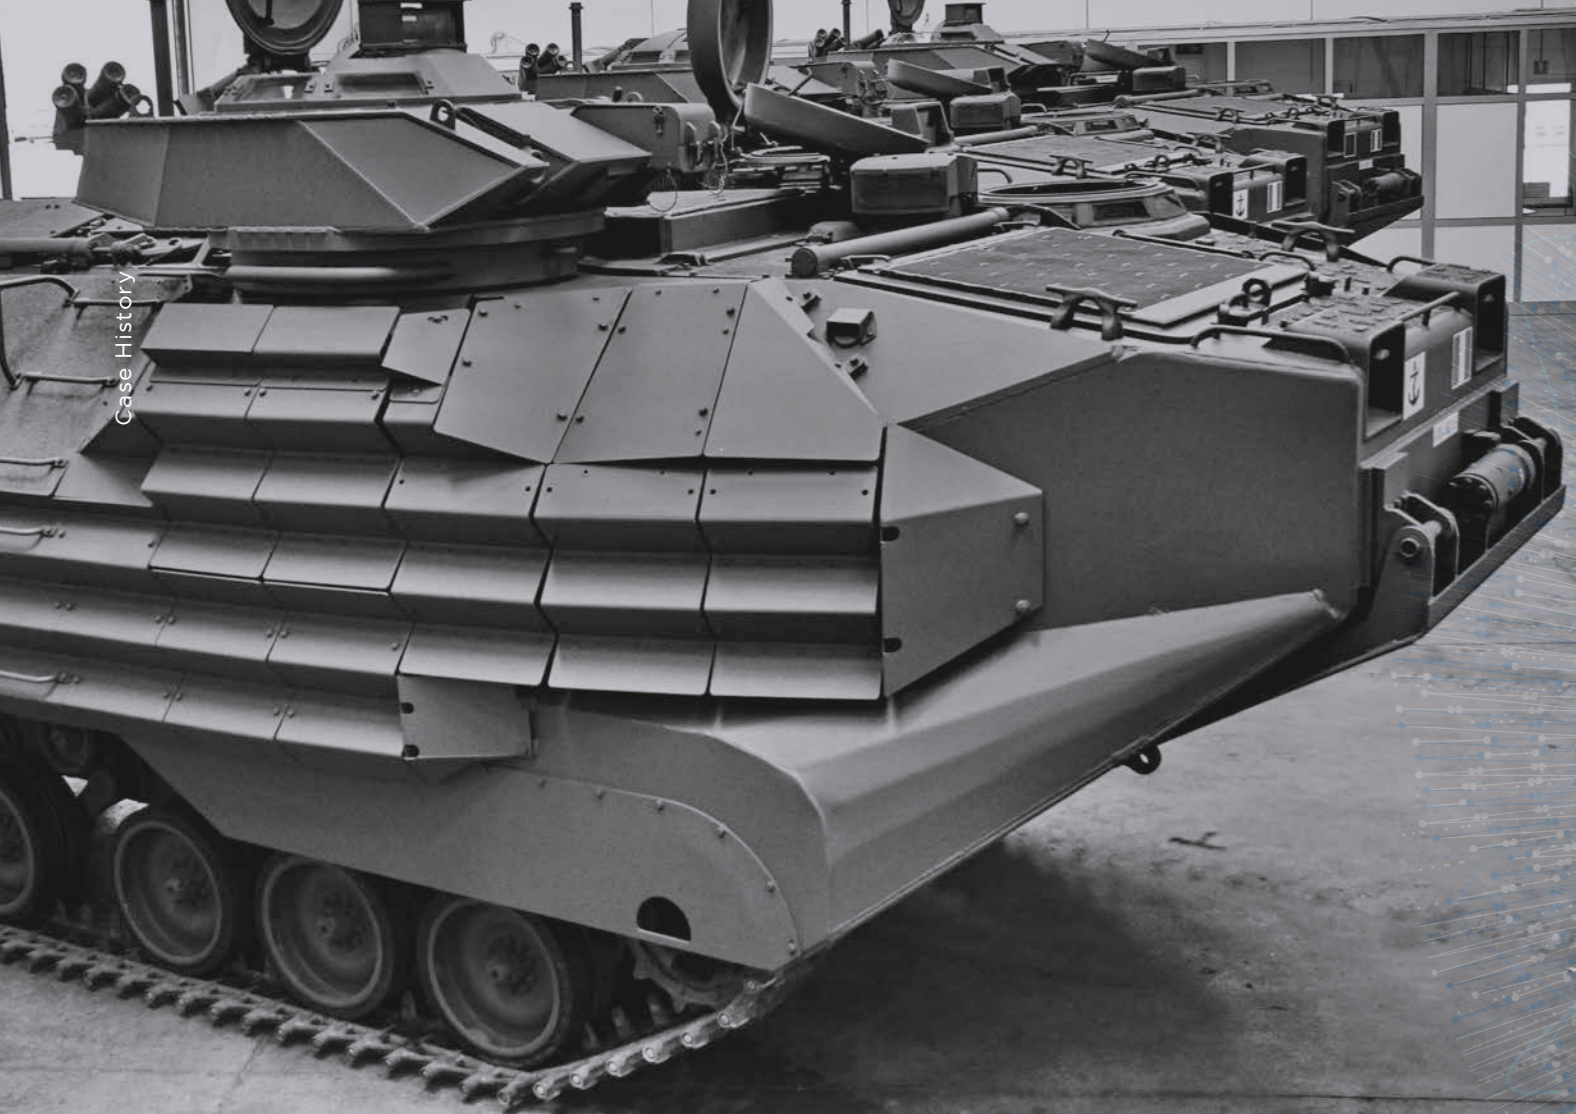

Once operations are completed, vehicles are tested along testing tracks or into the artificial pool, in case of amphibious ones, within the property before leaving the company.

PRODUCT RANGE

Goriziane is the front runner in the Military Sector as regards MRO: indeed our team is able to maintain, repair and overhaul any kind of military vehicles, heavy and light, wheeled, tracked and armoured. The expertise coming from the defence sector has allowed Goriziane to broaden its core business; nowadays Goriziane can provide complete maintenance for:

- » Civil vehicles such as buses, trucks, etc.
- » Earthmoving machines and tractors
- » Train equipment, rolling stock
(door and brake systems, engines, transmissions)
- » Drilling track machines
- » Pumps
- » Cranes and other lifting equipment
- » Vessels and ships
- » Marine equipment

DIVISION

ENGINEERING & CONSTRUCTION

The E&C Division has successfully been manufacturing reliable and long-lasting equipment and plants for several sectors for many years worldwide, and it is always ready to face new engineering challenges.

FROM CONCEPT TO COMPLETION

The Engineering & Construction Division offers turnkey projects fulfilling all their phases and paying attention to every detail. Each project is carefully supervised by a skilled project manager who is responsible for its execution. The initial phase includes feasibility studies and front-end engineering, the second one detailed engineering and procurement of materials, and the final one deals with construction activities and commissioning.

Last but not least the operational phase which provides technical assistance, maintenance and upgrade services. Reverse engineering is also among our range of services offered. We do not only carry out construction activities in-house, but when required, they can take place at construction sites or shipyards worldwide.

RESEARCH & DEVELOPMENT

Gorziane constantly invests in R&D in order to bring the most advanced high-technology solutions to the market. Our products are designed in such a way to increase productivity reducing effort and costs, improving comfort and saving time and energy.

Gorziane aims at making customers achieve their goals, as our satisfaction is customers' satisfaction. Customers' satisfaction is the key point to build long-lasting relationships with them.

MAINTENANCE, REPAIR, OVERHAUL

The E&C Division is directly linked to the other Company Division. Indeed Gorziane manufactured products can also be maintained, repaired, overhauled and upgraded in-house or on-site. Gorziane has the know-how to also carry out these types of activities on equipment and plants made by third parties.

There is a wide range of products repaired or upgraded over the years covering many sectors: **cranes and other lifting equipment, pumps, draw-works, generator sets, engines, and many others.**

The company also puts at customers' disposal training and technical support in the shortest time to avoid any prolonged downtime.

Offshore Mobile Rollers

Goriziane headquarters are located in Villesse (GO), in Italy, in north-eastern Italy. The **property covers an area of 150.000 Sqm** (covered area 35.000 Sqm), and it is equipped with a full range of facilities which allow smooth development of all manufacturing and repair processes. The area is also equipped with testing tracks and a artificial water pool to test all kind of vehicles.

COMPANY STRUCTURE

Goriziane has strengthened its presence abroad by establishing the following offices which focus their activities in the **E&C**, mainly in the Oil&Gas:

- » “**Goriziane Offshore Asia**” with headquarters in Singapore since 2014.
- » “**Goriziane Azerbaijan**” with headquarters in Baku since 2014.
- » “**Goriziane China**” with headquarters in Yantai since 2017.

GSE Manutenzioni is part of Goriziane. This firm, which is specialized in industrial services on an international scale, supports Goriziane in technical assistance providing customers with activities of assembling, repairing and overhauling at platforms, shipyards and on board of ships and vessels.

QUALITY

Goriziane acts in compliance with safety, health, environment and quality regulations and laws. Goriziane is indeed **certified AQAP 2110 and AQAP 2120** according to **NATO standards**.

Moreover, it is certified with **ISO14001 - BS OHSAS 18001, ISO/TS 29001** and **ISO 9001**.
